Projects and Involvement

Professional Portfolio

- Application: <https://isaackice.github.io/portfolio-id/>
- Repository: <https://github.com/isaackice/portfolio-id.git/>
- Created using strictly vanilla HTML and CSS

Marvel Characters

- Application: <https://pljon.github.io/marvel-character-project/>
- Repository: <https://github.com/pljon/marvel-character-project.git/>
- Created using HTML, CSS, JavaScript and Web APIs
- Managed all of the styling on the web application using vanilla CSS along with linking and making calls to the Wikipedia API while my teammates worked with the Marvel API

4RealGamers

- Application: <https://game-info-app.herokuapp.com>
- Repository: <https://github.com/ogwalrus/Game-Info-App.git/>
- MERN stack application built using JSON Web Token for user authentication and other technologies such as React, Bootstrap, custom CSS, API, GraphQL, and others
- Managed the front-end development while my teammates focused on the back-end
- Application allows the user to create an account, sign-in, search/view games, and purchase the games through specific stores
