https://github.com/isaackice | https://isaackice.github.io/portfolio-id/

Education

Rutgers University **March 2023**
- Full-Stack Web Development Bootcamp Certificate

Northland College **May 2020**
- Sales, Marketing, and Business Management AS

Projects and Involvement

Professional Portfolio
- Application: https://isaackice.github.io/portfolio-id/
- Repository: https://github.com/isaackice/portfolio-id.git/
- Created using strictly vanilla HTML and CSS

Employee Tracker
- Application: Must install through terminal refer to instructions in ReadMe
- Repository: https://github.com/isaackice/employee-tracker-id
- This command-line application was built from scratch to manage a company's employee database using Node.js, Inquirer and MySQL

Marvel Characters
- Application: https://pljon.github.io/marvel-character-project/
- Repository: https://github.com/pljon/marvel-character-project.git/
- Created using HTML, CSS, JavaScript and Web APIs
- Application allows users to search any Marvel Character and receive information including the characters name, image, background information and Wikipedia link by integrating the Marvel and Wikipedia APIs into the project

4RealGamers
- Application: https://game-info-app.herokuapp.com
- Repository: https://github.com/ogwalrus/Game-Info-App.git/
- MERN stack application built using JSON Web Token for user authentication and other technologies such as React, Bootstrap, custom CSS, API, GraphQL, and others
- Application allows the user to create an account, sign-in, search/view games, and purchase the games through specific stores
